

# Installing SimLab VR Viewer

This chapter details the procedure for installing the **SimLab VR Viewer** application on macOS. SimLab VR Viewer is a free, essential cross-platform application required to run, view, and participate in VR experiences, including collaboration sessions and viewing shared SimLab VR packages (.vrpackage files).

## 1.1 Download and Installation

To download the latest version of the SimLab VR Viewer installer for macOS, follow the link below.

### **Action:**

**Download the latest version of SimLab VR Viewer** for your operating system.

### **[Download for macOS]**

1. Once the download is complete, **locate the installer file** (typically named something like `SimLab_VR_Viewer_latest.exe`) in your designated downloads folder.
2. **Double-click the installer file** to initiate the installation process.
3. Follow the on-screen instructions of the Setup Wizard:

- Read and accept the **License Agreement**.
  - Select the **Installation Location** (the default path is usually recommended).
  - Click **Install** to begin copying the files.
4. Wait for the installation to complete. A progress bar will indicate the status.
  5. Once the installation is finished, click **Finish**. The option to **Launch SimLab VR Viewer** may be selected by default; if so, the application will start immediately.

---

## 1.2 System Requirements (Minimum)

Ensure your macOS system meets the following minimum requirements to run the SimLab VR Viewer effectively, especially for VR mode:

Component	macOS Requirement
<b>Operating System</b>	Latest macOS Monterey (12) or later
<b>Processor</b>	Quad-core Intel, 2.5 GHz or faster, <b>or</b> Apple Silicon (M1/M2/etc.)
<b>Memory (RAM)</b>	8 GB or more
<b>Graphics Card</b>	Metal 1.2 Compatible Graphics Card
<b>Free Storage</b>	4 GB
